

# Back to Gather

## Back to Life

The **Heal iD** smartphone app transforms Covid-19 isolation and lockdowns into busy restaurants and fun gatherings!

SAFE.  
SIMPLE.  
SECURE.

**Heal iD**

Heal ID is a global, borderless, privacy-preserving platform. With a simple, device-to-device QR-code anybody can verify whether a party's counterpart is sufficiently immune or not.

## The Power of Decentralized Technology

**Heal iD** is the safe way to go back to restaurants, coffee shops, celebrations, weddings, and socialize and interact with friends and neighbors.

A scan of a Heal ID barcode lets anybody check anybody else' functional immunity status, without revealing identities. It works with the standard and certifier of your choice – even your own!

### ➤ Private

Encrypted, private, and without need for tracing, or trusting middlemen.

### ➤ Flexible

Adjusts to new tests, standards, and scientific findings, including your own.

### ➤ Easy to use

Point and look, not even requiring a click.

### ➤ Empowering

Leaves the individual in charge, sharing your data only with your consent.

### ➤ Inclusive

Protects anyone, anywhere, including high-risk people and your community

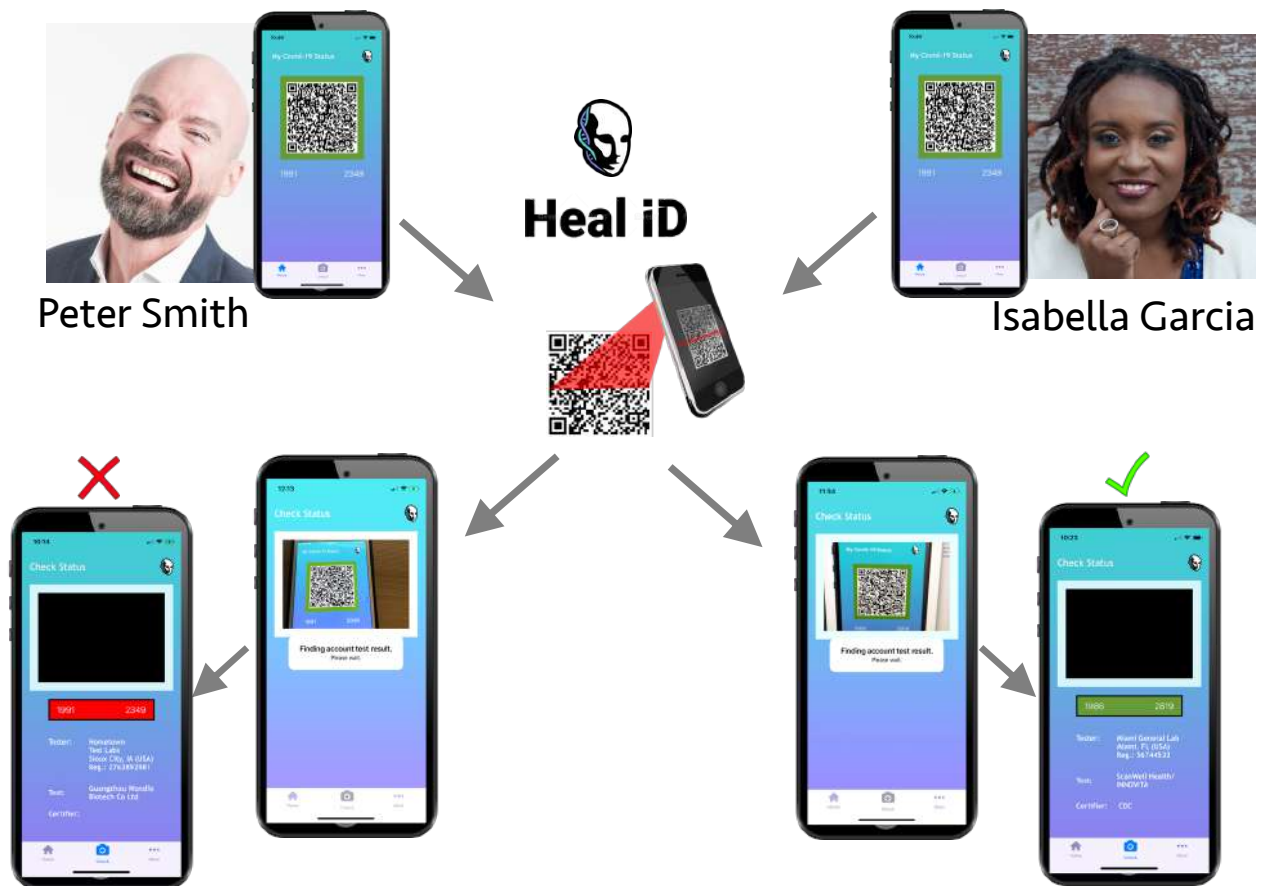

## Only Smartphone Required!

- No infrastructure investment
- No interfaces

## Know & Verify

- When entering a restaurant, coffee shop, or ice cream store.
- When eating and drinking with family, friends, or neighbors.
- When going to weddings, celebrating, or just socializing.

Although Peter was tested, test results are not up to the restaurant's standards. He will have to continue social distancing, but **he can gather with functionally immune friends.**

Isabella's scan reflects acceptable test results suggesting likely functional immunity. She is free to go to any restaurant or social function.

## The Power of Simplicity

Scan and Order Today!

Heal iD

Global. Borderless. Privacy.
