

# Back to School

## Back to Life

The **Heal iD** smartphone app transforms Covid-19 isolation and lockdowns into campus activity!

SAFE.  
SIMPLE.  
SECURE.

**Heal iD**

Heal ID is a global, borderless, privacy-preserving platform. With a simple, device-to-device QR-code anybody can verify whether a party's counterpart is sufficiently immune or not.

## The Power of Decentralized Technology

**Heal iD** is the safe way to go back to campus, go off campus, visit campus, and interact with your community.

A scan of a Heal ID barcode lets anybody check anybody else' functional immunity status, without revealing identities. It works with the standard and certifier of your choice – even your own!

### ➤ Private

Encrypted, private, and without need for tracing, or trusting middlemen.

### ➤ Flexible

Adjusts to new tests, standards, and scientific findings, including your own.

### ➤ Easy to use

Point and look, not even requiring a click.

### ➤ Empowering

Leaves the individual in charge, sharing your data only with your consent.

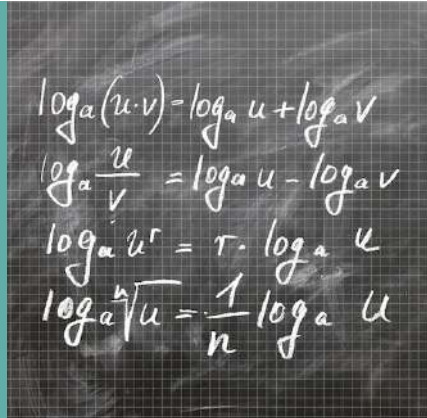

### ➤ Inclusive

Protects anyone, anywhere, including high-risk people and your community

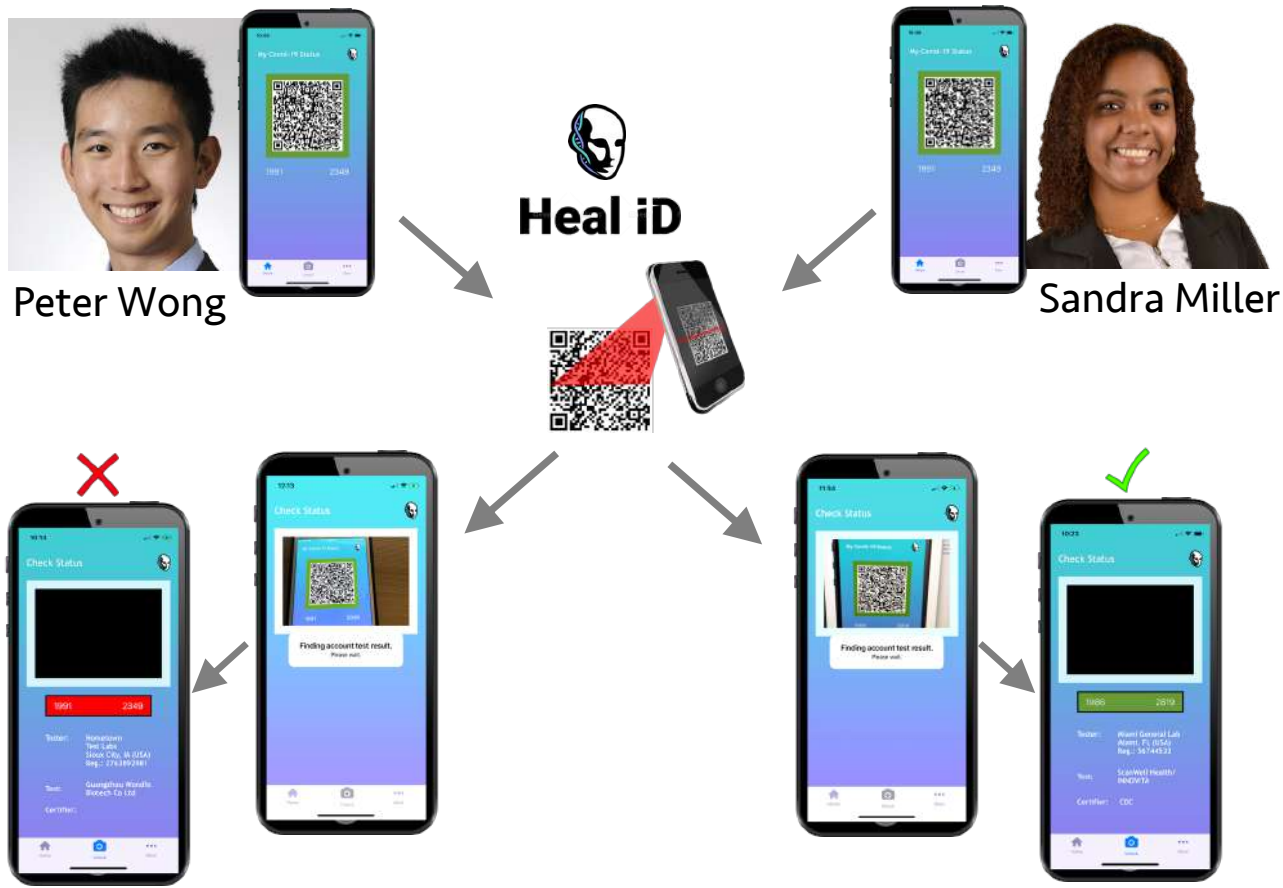

### Only Smartphone Required!

- No infrastructure investment
- No interfaces

**Know & Verify**

- When entering a dormitory, library, lab, or lecture hall
- When meeting and interacting with students, faculty, the community
- When traveling and socializing

Although Peter was tested, test results are not up to the school's standards. He will have to continue social distancing, but **he can be together with others that are functionally immune.**

Sandra's scan reflects acceptable test results suggesting likely immunity. She is free to socially interact.

# The Power of Simplicity

Scan and Order Today!

Heal iD

Global. Borderless. Privacy.
