

# Back to Shop

## Back to Life

The **Heal iD** smartphone app transforms Covid-19 isolation and lockdowns into busy stores and personal shopping!

SAFE.  
SIMPLE.  
SECURE.

Heal ID is a global, borderless, privacy-preserving platform. With a simple, device-to-device QR-code anybody can verify whether a party's counterpart is sufficiently immune or not.

## The Power of Decentralized Technology

**Heal ID** is the safe way to go back to stores and shops, including those where personal services and the human touch are key to the experience.

A scan of a Heal ID barcode lets anybody check anybody else's functional immunity status, without revealing identities. It works with the standard and certifier of your choice – even your own!

➤ Private

Encrypted, private, and without need for tracing, or trusting middlemen.

➤ Flexible

Adjusts to new tests, standards, and scientific findings, including your own.

➤ Easy to use

Point and look, not even requiring a click.

➤ Empowering

Leaves the individual in charge, sharing your data only with your consent.

➤ Inclusive

Protects anyone, anywhere, including high-risk people and your community

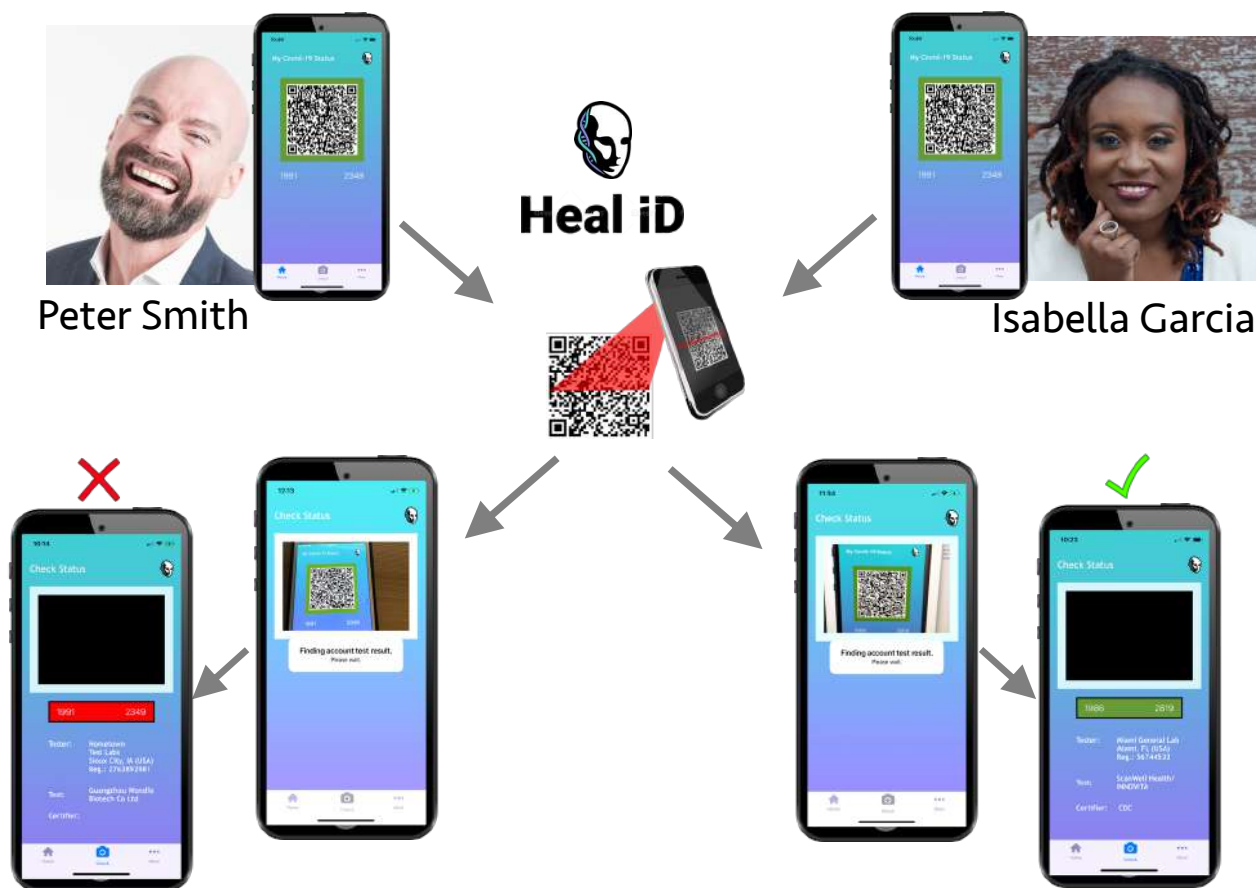

## Only Smartphone Required!

- No infrastructure investment
- No interfaces

## Know & Verify

- When entering a store or shop.
- When receiving in-person services and consultation.
- When mingling with people in the mall or shopping district.

Although Peter was tested, test results are not up to the store's standards. He will have to continue social distancing, but **he can shop with functionally immune people.**

Isabella's scan reflects acceptable test results suggesting likely functional immunity. She is free to go to any store or social function.

## The Power of Simplicity

Scan and Order Today!

Heal iD

Global. Borderless. Privacy.
