

Back to Travel

Back to Life

The **Heal iD** smartphone app transforms Covid-19 isolation and lockdowns into fun and business travel again!

SAFE.
SIMPLE.
SECURE.

Heal ID is a global, borderless, privacy-preserving platform. With a simple, device-to-device QR-code anybody can verify whether a party's counterpart is sufficiently immune or not.

The Power of Decentralized Technology

Heal iD is the safe way to go back on the road, using airplanes, trains, subways, and hotels.

A scan of a Heal ID barcode lets anybody check anybody else' functional immunity status, without revealing identities. It works with the standard and certifier of your choice – even your own!

➤ Private

Encrypted, private, and without need for tracing, or trusting middlemen.

➤ Flexible

Adjusts to new tests, standards, and scientific findings, including your own.

➤ Easy to use

Point and look, not even requiring a click.

➤ Empowering

Leaves the individual in charge, sharing your data only with your consent.

➤ Inclusive

Protects anyone, anywhere, including high-risk people and your community

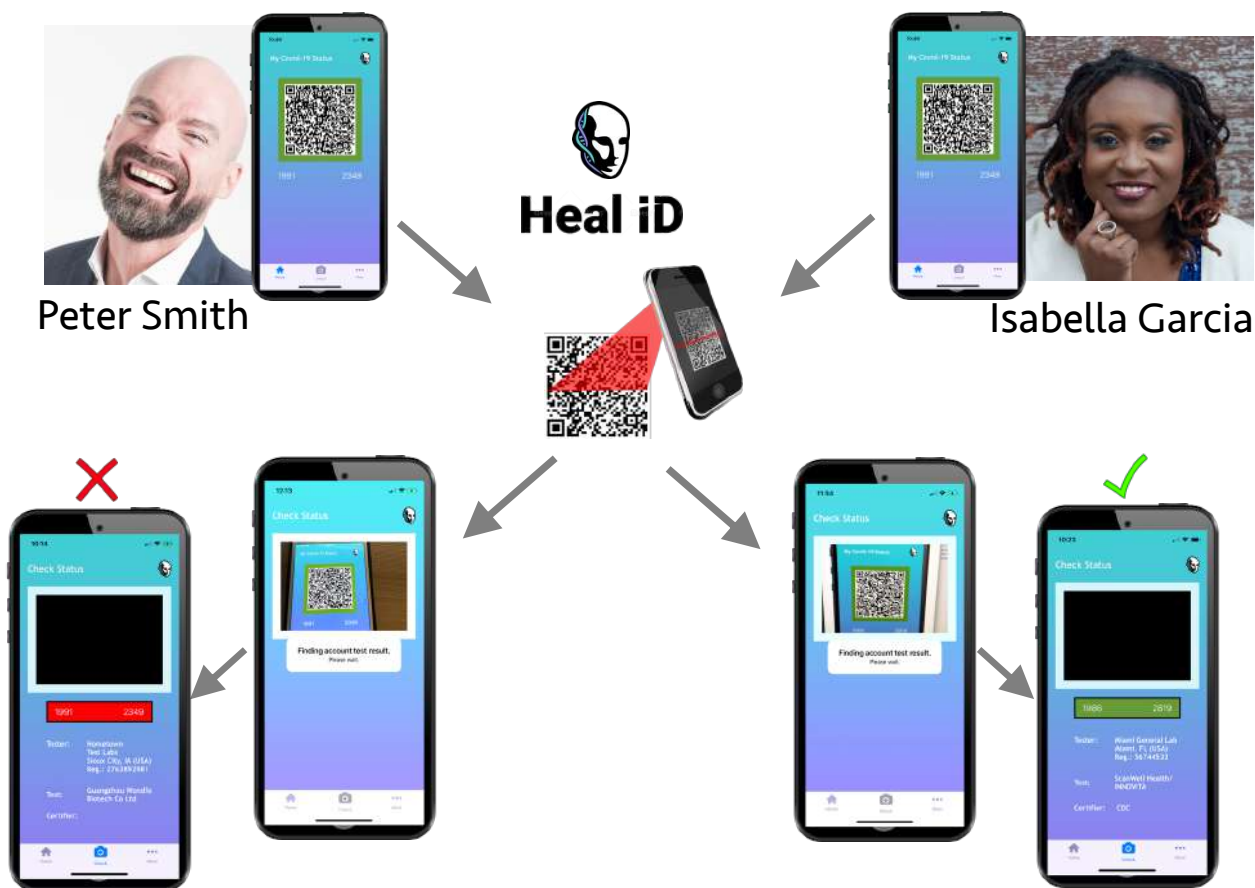

Only Smartphone Required!

- No infrastructure investment
- No interfaces

Know & Verify

- When entering a plane, train, or public transportation.
- When having dinner or engaging in group activities.
- When meeting people for business or fun.

Although Peter was tested, test results are not up to the travel organizer’s standards. He will have to continue social distancing but **can stay close to functionally immune people.**

Isabella’s scan reflects acceptable test results suggesting likely functional immunity. She is free to go to use the means and forms of travel she chooses.

The Power of Simplicity

Scan now and order today!

Heal iD

Global. Borderless. Privacy.
